TRIPLE MAX SELECT™

ADJUVANT

PRINCIPAL FUNCTIONING AGENTS

Monocarbamide dihydrogen sulfate, nonionic surfactants, humectants, chelating agents and ingredients

ineffective as spray adjuvants 100.0%

Total 100.0%

All ingredients are exempt from tolerance under 40 CFR 180

WATER CONDITIONER - ACIDIFIER - SURFACTANT

KEEP OUT OF REACH OF CHILDREN DANGER

CORROSIVE. Harmful or fatal if swallowed. Avoid contact with skin, eyes or clothing. Do not take internally. Wear chemical splash goggles, face shield, acid impermeable gloves, long-sleeve shirt and pants, rubber apron and shoes and socks. Do not eat, drink, smoke or chew gum while using this product. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. In addition, follow precautionary statements on all products used with this material. Clean affected clothing, shoes, and protective equipment before reuse.

FIRST AID

IF SWALLOWED:	<ul style="list-style-type: none"> • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by a poison control center or doctor. • Do not give anything by mouth to an unconscious person.
IF ON SKIN OR CLOTHING:	<ul style="list-style-type: none"> • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes.
IF INHALED:	<ul style="list-style-type: none"> • Move person to fresh air. • If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth if possible.
IF IN EYES:	<ul style="list-style-type: none"> • Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses if present, after the first 5 minutes, then continue rinsing eye.
Call a poison control center or doctor immediately for treatment advice. Have the product container with you when calling a poison control center or doctor, or going for treatment.

TRIPLE MAX SELECT™

ADJUVANT

GENERAL INFORMATION

Combining superior water conditioning agents, nonionic surfactants and humectants into a single blend, Triple Max SELECT is an ideal tank mix additive for most pesticide spray operations. By using multiple exceptional components, this adjuvant improves the efficacy of pesticides applied under a wide range of conditions. Use Triple Max SELECT in place of the multiple adjuvants that would be needed to mitigate the effects of hard water, reduce the surface tension of spray droplets and slow drying times.

Triple Max SELECT will maintain the quality of water used in the tank mix by minimizing the antagonism caused by calcium, magnesium and iron ions found in most irrigation waters. Untreated, these ions can combine with pesticides actives, reducing their solubility and inhibiting their effectiveness.

Triple Max SELECT also reduces the surface tension of spray droplets. With a lower surface tension, spray droplets spread to cover more surface area as soon as they reach the target surfaces. By covering more of the target's surface, the actives are more readily available to quickly penetrate the surface and reach the interior layers, providing a quicker kill.

Triple Max SELECT includes humectants that hinder the evaporation of spray droplets, increasing the length of time active ingredients are available to move into the plant interior.

DIRECTIONS FOR USE

Follow all pesticide label instructions. Triple Max SELECT will cause a significant reduction in the pH of tank mixes. If the pesticide label does not allow low pH conditions, another adjuvant should be used. If the applicator does not have experience using this product, a phytotoxicity (jar) test must be performed to facilitate safety and compatibility with each tank mix. If the pesticide label does not provide a recommended mixing order, follow these directions:

1. Fill the tank a minimum of 1/2 full with water and begin agitation.
2. Add dry formulations (DG, DF or other water soluble formulations) and mix thoroughly.
3. Continue agitation while adding the other ingredients, such as pesticides, fertilizers and other adjuvants.
4. Add Triple Max SELECT last.

USE RATES

Active Pesticide	USE RATE Per 100 Gallons of Spray Solution
Fully loaded glyphosate	1 - 2 quarts
Partially or unloaded glyphosate	2 - 4 quarts
Most other active ingredients	1 - 2 quarts

STORAGE AND DISPOSAL

Storage: Store in a cool, dry place. Store in original container only. Do not add anything to the container. Keep container tightly sealed when not in use. Do not store near fire, flame or other potential sources of ignition. Do not contaminate water, food or feed by storage or disposal of this product. Do not store in mild steel or aluminum containers. Do not store near strong oxidizers.

Disposal: Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrecycle.org. Decontaminated containers and materials must be disposed of in a manner allowed by local, state and federal laws and regulations.

WARRANTY STATEMENT

Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label, when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to the seller, and buyer assumes the risk of any such use.
