

# Limestone

# **Safety Data Sheet**

1. Product & Company Identification

Other means of identification

Synonyms Crushed Limestone, Aglime, Construction Aggregate, Feed Grade

Calcium Carbonate, Lawn & Garden Aglime, Barn-Dri, Athletic Field

Marker, Hi-Calcium Filler

Recommended use Limestone may be used in the manufacture of bricks, mortar, cement,

concrete, plasters, paving materials, and other construction materials, steel production, consumer products, animal feed supplement, mineral filler and other goods. Limestone may be distributed in bags, totes, and

bulk shipments. Applies to all gradations.

Recommended restrictions None known.

Manufacturer information/Supplier/Distributor information:

Company imi Aggregates

Division of Irving Materials, Inc. 8032 N State Road 9, Greenfield, IN 46140

Address 8032 N State Ro
Telephone (317) 326-3101
Website www.irvmat.com

Normal Hours of Operation 8:00 AM to 5:00 PM Monday thru Friday

2. Hazard(s) Identification

Physical hazards Not classified.

Health hazards Carcinogenicity Category 1A

Specific Target Organ Toxicity, Category 2

Repeated Exposure

Not classified.

**OSHA** defined hazards

Label elements

Signal word

Danger

**Hazard statement** 

May cause cancer. May cause damage to organs (lung) through

prolonged or repeated exposure.

**Precautionary statements** 

Prevention

Obtain special instruction before use. Do not handle until all safety precautions have been read and understood. Wear protective

gloves/protective clothing/eye protection/face protection.

Response

If exposed or concerned: Get medical advice/attention.

Storage

Restrict or control access to stockpile areas. Engulfment hazard: to prevent burial or suffocation, do not enter a confined space, such as a

imi Aggregates Division of Irving Materials, Inc. Page 1 of 8

## Disposal

Hazard(s) not otherwise classified Supplemental information

silo, bulk truck or other storage container or vessel that stores or contains aggregates without an effective procedure for assuring safety.

Dispose of contents/container in accordance with local/regional/national/international regulations.

None known.

Respirable Crystalline Silica (RCS) may cause cancer. Limestone is a naturally occurring mineral complex that contains varying quantities of quartz (cyrstalline silica). In its natural bulk state, limestone is not a known health hazard. Limestone may be subjected to various natural or mechanical forces that produce small particles (dust) which may contain respirable crystalline silica (particles less than 10 micrometers in aerodynamic diameter). Repeated inhalation of respirable crystalline silica may cause lung cancer according to IARC and NTP and ACGIH states that it is a suspected cause of cancer. Other forms of RCS (e.g. tridymite and cristobalite) may also be present or formed under certain industrial processes.

# 3. Composition/information on ingredients

lixtures Chemical name	CAS number	%	
Calcium Carbonate	1317-65-3	>50	
Crystalline Silica (Quartz)	14808-60-7	>0.1	

## First-aid measures

Ingestion

Inhalation	Limestone dust: Move to fresh air. Call a physician if symptoms develop or persist.
Skin contact	Limestone dust: Wash off with soap and water. Get medical attention if irritation develops and persists.
Eye contact	Limestone dust: Immediately flush with plenty of water for at least

Limestone dust: Immediately flush with plenty of water for at least 15 minutes. Hold eyelids apart. Occasionally lift the eyelid(s) to ensure thorough rinsing. Beyond flushing, do not attempt to remove material from the eye(s). Get medical attention if irritation develops or persists.

Limestone dust: Rinse mouth and drink plenty of water. Never give anything by mouth to an unconscious person. Get medical attention. Inhaling dust may cause discomfort in the chest, shortness of breath,

and coughing.

Prolonged inhalation may cause chronic health effects. This product contains crystalline silica. Prolonged or repeated inhalation of respirable crystalline silica liberated from this product can cause silicosis, and may cause cancer.

Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed

attention and special treatment needed **General information** 

Indication of immediate medical

Most important symptoms/effects

Acute and delayed

Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Pre-existing medical conditions that may be aggravated by exposure include disorders of the eye, skin and lung (including asthma and other breathing disorders). If addicted to tobacco, smoking will impair the ability of the lungs to clear themselves

of dust.

# 5. Fire-fighting measures

Limestone is not flammable. Use fire extinguishing media Suitable extinguishing media appropriate for surrounding materials.

Unsuitable extinguishing media Specific chemical hazards

None known.

No unusual fire or explosion hazards noted. Not a combustible dust.

imi Aggregates Division of Irving Materials, Inc. Page 2 of 8

Special protective equipment and precautions for firefighters Firefighting equipment/instructions

Use protective equipment appropriate for surrounding materials.

No specific precautions.

Contact with powerful oxidizing agents may cause fire and/or explosions

(see section 10 of SDS).

General fire hazards

Specific methods

No unusual fire or explosion hazards noted.

## 6. Accidental release measures

Personal precautions, and emergency procedures

Wear appropriate protective equipment and clothing during clean-up of materials that contain or may liberate limestone dust.

Methods and materials for containment and cleaning up

Spilled material, where dust is generated, may overexpose cleanup personnel to respirable crystalline silica containing dust. Do not dry sweep or use compressed air for clean-up. Wetting of spilled material and/or use of respiratory protective equipment may be necessary.

**Environmental precautions** 

Avoid discharge of fine particulate matter into drains or water courses.

# 7. Handling and storage

Precautions for safe handling

Do not handle until all safety precautions have been read and understood. Keep formation of airborne dust to a minimum. Provide appropriate exhaust ventilation at places where dust is formed. Do not breathe dust. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

Conditions for safe storage

Avoid dust formation or accumulation.

# 8. Exposure Controls/Personal protection

## Occupational exposure limits

- 1 Value equivalent to OSHA formulas (29 CFR 1910.1000; 29 CFR 1917; 29 CFR 1918)
- 2 Value also applies to MSHA Metal/Non-Metal (1973 TLVs at 30 CFR 56/57.5001).
- 3 OSHA enforces 0.250 mg/m³ in construction and shipyards (CPL-03-00-007).
- 4 Value also applies to OSHA construction (29 CFR 1926.55 Appendix A) and shipyards (29 CFR 1915.1000, Table Z).
- $5 MSHA limit = 10 mg/m^3$ .

## U.S. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Type	Value	Form	
Particulates not otherwise classified (CAS SEQ250)	PEL	5 mg/m³ 15 mg/m³	Respirable fraction Total dust (4)	

#### U.S. OSHA Table Z-3 (29 CFR 1910.1000)

Components	Type	Value	Form
Crystalline Silica (Quartz) (CAS 14808-60-7)	TWA	0.3 mg/m <sup>3</sup> 0.1 mg/m <sup>3</sup>	Total dust (1,2) Respirable (1,2,3)
Tridymite and Cristobalite (others forms of crystalline silica) (CAS Mixture)	TWA	0.15mg/m <sup>3</sup> 0.05 mg/m <sup>3</sup>	Total dust (1) Respirable (1,2)
Particulates not otherwise classified (CAS SEQ250)	TWA	5 mg/m³ 15 mg/m³	Respirable fraction (1) Total dust (1,4,5)

#### U.S. ACGIH Threshold Limit Values®

Components	Type	Value	Form	
Crystalline Silica (all forms; CAS mixture)	TWA	0.025 mg/m <sup>3</sup>	Respirable fraction	America and

Particulates not otherwise classified (CAS SEQ 250)

**TWA** 

3 mg/m<sup>3</sup> 10 mg/m<sup>3</sup>

Respirable particles (2) Inhalable particles (2)

#### U.S NIOSH: Pocket Guide to Chemical Hazards

Components	Type	Value	Form	
Crystalline Silica (all forms; CAS mixture)	TWA	0.05mg/m <sup>3</sup>	Respirable dust	

Biological limit value

No biological exposure limits noted for the ingredient(s).

Exposure guidelines OSHA PELs, MSHA PELs, and ACGIH TLVs are 8-hr TV

OSHA PELs, MSHA PELs, and ACGIH TLVs are 8-hr TWA values. NIOSH RELs are for TWA exposures up to 10-hr/day and 40-hr/wk. Occupational exposure to nuisance dust (total and respirable) and respirable crystalline silica should be monitored and controlled. Terms including "Particulates Not Otherwise Classified", "Particulates Not Otherwise Regulated", "Particulates Not Otherwise Specified", and "Inert or Nuisance Dust" are often used interchangeably; however, the user should review each agency's terminology for differences in meanings.

Appropriate engineering controls Good general ventilation (typically 10 air changes per hour indoors)

should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain

airborne levels to an acceptable level.

Individual protection measures, such as personal protective equipment

Eyelface protection Wear safety glasses with side shields (or goggles).

Skin protection

Hand Protection Use personal protective equipment as required.

Other Use personal protective equipment as required.

Respiratory protection When handling or performing work with limestone

tion

When handling or performing work with limestone that produces
dust or respirable crystalline silica in excess of applicable exposure
limits, wear a NIOSH-approved respirator that is properly fitted and is in

good condition. Respirators must be used in accordance with all

applicable workplace regulations.

Thermal hazards Not anticipated. Wear appropriate thermal protective clothing, when

necessary.

General hygiene considerations Always observe good personal hygiene measures, such as washing after

handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove

contaminants.

# 9. Physical and chemical properties

**Appearance** 

Physical state Solid.

Form Solid, particles.

**Color** Gray, brown and variations of gray and brown.

Odor Not applicable.
Odor threshold Not applicable.

Insoluble. Solubility(ies) (water) Not applicable. Partition coefficient (n-octanol/water) **Auto-ignition temperature** Not applicable. Not applicable. **Decomposition temperature** 

Viscosity

Not applicable. Other information

Not applicable. **Explosive properties Flammability** Not applicable.

10. Stability and reactivity

Reactivity The product is stable and non-reactive under normal conditions of use,

storage and transport.

Chemical stability Material is stable under normal conditions.

Possibility of hazardous reactions No dangerous reaction known under conditions of normal use.

11. Toxicological information

Information on likely routes of exposure

Repeated inhalation of respirable crystalline silica (quartz) may cause Inhalation

silicosis, a fibrosis (scarring) of the lungs. Silicosis is irreversible and may

be fatal. Silicosis increases the risk of contracting pulmonary

tuberculosis. Some studies suggest that repeated inhalation of respirable crystalline silica may cause other adverse health effects including lung

and kidney cancer.

Skin contact Limestone may cause irritation through mechanical abrasion.

Eye contact Limestone may cause irritation through mechanical abrasion.

Not likely due to the form of the product. However, accidental ingestion Ingestion

of limestone may cause discomfort.

Symptoms related to the physical,

chemical and toxicological

characteristics

Limestone dust: discomfort in the chest. Shortness of breath, coughing.

Information on toxicological effects

Not expected to be acutely toxic. **Acute toxicity** 

Skin corrosion/irritation This product is not expected to be a skin hazard.

Serious eye damage/irritation Direct contact with eyes may cause temporary irritation.

Respiratory or skin sensitization

Respiratory sensitization No respiratory sensitizing effects known.

Skin sensitization Not known to be a dermal irritant or sensitizer.

No data available to indicate product or any components present at Germ cell mutagenicity

greater than 0.1% are mutagenic or genotoxic.

Respirable crystalline silica has been classified by IARC and NTP as Carcinogenicity

known human carcinogen, and classified by ACGIH as a suspected

human carcinogen.

IARC Monographs - Overall Evaluation of Carcinogenicity

Crystalline Silica (Quartz) (CAS 14808-60-7)

1 Carcinogenic to humans.

imi Aggregates Division of Irving Materials, Inc. Page 5 of 8

Respirable Tridymite and Cristobalite (other forms of Crystalline Silica) (CAS mixture)

1 Carcinogenic to humans.

**NTP Report of Carcinogens** 

Crystalline Silica (Quartz) (CAS 14808-60-7)

Known to be human carcinogen.

OSHA Specifically Regulated Substances (29 CFR 1910.1000-1050)

None listed.

Reproductive toxicity

Not expected to be a reproductive hazard.

Specific target organ toxicity - single exposure

Not classified.

Specific target organ toxicity - repeated exposure

Respirable crystalline silica may cause damage

to organs (lung) through prolonged or repeated

exposure.

Aspiration hazard Chronic effects

Due to the physical form of the product it is not an aspiration hazard. Prolonged inhalation of respirable crystalline silica may be harmful as it may cause damage to organs (lung) through prolonged or repeated exposure. There are reports in the literature suggesting that excessive crystalline silica exposure may be associated with autoimmune disorders and other adverse health effects involving the kidney. In particular, the incidence of scleroderma (thickening of the skin caused by swelling and thickening of fibrous tissue) appears to be higher in silicotic individuals. To date, the evidence does not conclusively determine a causal relationship between silica exposure and these adverse health effects.

12. Ecological information

Ecotoxicity Not expected to be harmful to aquatic organisms. Discharging sand

and gravel dust and fines into water may increase total suspended

particulate (TSP) levels that can be harmful to certain aquatic organisms.

Persistence and degradability

Bioaccumulative potential

Mobility in soil

Other adverse effects

Not applicable.

Not applicable.

Not applicable.

No other adverse environmental effects are expected from this material.

13. Disposal considerations

**Disposal instructions**Do not allow fine particulate matter to drain into sewers/water supplies.

Do not contaminate ponds, waterways or ditches with fine particulates. Dispose of contents in accordance with local/regional/national/

international regulations.

Hazardous waste code

Contaminated packaging

Waste from residue/unused products

Not regulated.

Dispose of in accordance with local regulations. Empty containers or

liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Since emptied containers may retain product residue, follow label

warnings even after container is emptied. Empty packaging materials should be recycled or disposed of in accordance with applicable

regulations and practices.

14. Transport information

**DOT** Not regulated as dangerous goods.

IATA Not regulated as dangerous goods.

Transport in bulk according to Annex II of MARPOL 73/78 and IBC Code Not applicable.

15. Regulatory information

imi Aggregates Division of Irving Materials, Inc. Page 6 of 8 U.S. federal regulations
